

DIAMCAD BOND

For more than 25 years, Diamcad has been a leading Antwerp diamond company, specialized in optimizing and processing rough diamonds, by means of high-tech instruments and computer algorithms. Diamcad has 40 employees, and the company has a consolidated turnover of more than 50 million EURO.

The investor is given the opportunity to invest directly and flexibly in a renowned company that truly creates an added value, instead of the investor investing via complex bank products or funds that are not transparent.

> TOP QUALITY DIAMONDS

The sums borrowed are used by Diamcad to purchase top quality rough diamonds. These diamonds are then optimized and processed by Diamcad and the cut diamonds are sold on the international diamond market. The historic stability of the diamond prices is therefore a strong guarantee for the Diamcad bond.

> A LONG TRADITION

Diamcad already has a 20 year tradition of borrowing funds directly from private individuals and companies in order to create a win-win situation:

- For the lender a high, fixed rate of interest in the short term with a 100% capital guarantee
- For Diamcad the possibility of purchasing diamonds, allowing it to grow independently

> INVESTMENT AMOUNT

From €100.000, 100% capital guarantee.

> DURATION

Complete investment on demand **within 3 months**.

Since Diamcad invests in moveable property (diamonds), Diamcad can guarantee repayment in the short term because it is continually able to sell the diamonds in stock on the international diamond market.

> INTEREST

Yearly gross interest: **4,5%**

Advance levy: 30%

Yearly net interest: 3,15%

> CAPITALIZATION

There is a choice each year of capitalizing the interests or having them paid out.

> COSTS

There are no management fees, no registration or cancellation fees, and no storage costs.

> TRANSPARENCY

A company visit is possible so that you can see what you are investing in.

> FOLLOW-UP

The registrations and the interest calculations are managed via a web application on diamcadfinance.com which the bondholder can access so that he can continually find out about the status of his investment.
